Training and Seminars

20. Academic Informatics Instructor
- Building Rest API with Spring Boot (40 Hour)

More Java EE
- Levent Erguder (Hibernate/JSF/Spring) - (4 Months)

18. Academic Informatics
- Clean Code (40 Hours)

2015 Linux Summer Camp
- Web Programming with Spring MVC (123 Hour)

Eteration
- Java Bootcamp (80 Hour)

19. Academic Informatics
- Python for Gnu/Linux (44 Hour)

2016 Linux Summer Camp
- Web Programming with Ruby on Rails (123 Hour)

Oracle Academy Course(s)
- Database Design & Programming with SQL

About

Firstly I started programming at the age of 13. I like learning new technologies and research. I love to try new technologies. I like to learn new things and software development but my main stack is JVM. Actually, I adopt the philosophy of being like "T". I also an ambitious and compatible person. I like to take responsibility and I'm not afraid of that. I'm always open to innovation and I want to be software craftsman like Robert C. Martin.

Education

From August 2013 to May 2018

Karabük University
Computer Engineering 3.01

- English Preparation
- I built a movie recommendation engine in microservices architecture like "Netflix".

Tech Stack: Netflix Eureka, Zuul Proxy, Spring Boot, Docker, Apache Kafka, MongoDB, Angular 4, Swagger UI, JUnit, Mockito Some of the technologies I use are...

https://github.com/memojja/recomendation-engine-monolithic-to-microservice

Exprience

January 2019

Software Engineer
NETAS Istanbul

Currently working as a Software Engineer in a telecom platform with an international team.
Design & Development for a highly available and scalable telecom microservices.

Live project link: https://apimarket.att.com

Technologies:
- Spring Stack(Spring Boot, Spring State Machine, Reactive..)
- RabbitMQ, Kafka
- Hazelcast, Redis , Postgresql
- Docker, Kubernetes, Vagrant, Nginx, Kong, Keycloak

From August 2018 to January 2019

Software Consultant
Anadolu Sigorta İstanbul

I worked as a software consultant on the "ASOS" project that is based on domain driven design and using new technologies combined with some third-party insurance frameworks.

I worked on the motor-insurance department also maintaining the billing and accounting system. Creating and running batch services to validate the transaction record by calculating the exact amounts and taxes to provide the government and the clients as well.

Technologies:
- Spring framework, Struts 2
- JSP
- Hibernate
- Oracle

Reference

Fatih Çiftci
Raven Teknoloji - CTO
Tel : 05325434713

Ömer Ozkan
[Atlassian](#) **- Software Engineer**
Tel : 05557715375

Esat Aydoğan
Bnp Paribas Cardif - Senior Java Developer
Tel : 05442903575

İzni Burak Demirtas
NETAS - Software Engineer
Tel : 05066072221

Onur Anlı
OBSS - Software Engineer
Tel : 05456359918

From May 2018 to August 2018

Software Specialist
Biotekno Ataşehir/Istanbul, Turkey

I worked on "Vodofone Mobile Form" application and my responsible was maintain that microservices project. And also i created offline map ionic plugin.

Technologies :
- NodeJS, PHP, Spring Boot
- AngularJS / Ionic
- Android
- Redis
- RabbitMQ

From September 2017 to May 2018

Java Developer
Bilgisayar Kavramları Istanbul

I worked as a remote java developer and I built a lot of services for the "Financial Consulting" application but generally crud operation and cron job things.

Technologies :
- Spring Boot
- AngularJS
- Google Cloud

From July 2017 to September 2017

Project Intern
Kod Gemisi İstanbul

I was an intern but actually, I worked at the real SDLC management application for the "Allianz Insurance".
I often used Bamboo and Bitbucket API to virtualize the result

Technologies :
- Spring Boot/ Security
- Thymeleaf / Jquery (Chart.js, fullcalendar.io)

From June 2016 to July 2016

Intern
Cybersoft Odtu Teknopark

I've been doing research on microservices. I made a little billing system.

Technologies :
- Spring Cloud / Boot
- Thymeleaf

From September 2012 to June 2013

Intern
Atos Turkiye İstanbul

I moved the contents of Siemens intranet system to SharePoint and created a little HTML mailing.

Technologies :
- C#
- Html/Css/Js

Backend

Main Language	Java 8
Other Languages	Go, Ruby/Ruby on Rails, Php/Codeigniter, Nodejs, Python
Spring Technologies	Spring Boot, Spring Cloud, Spring Rest, Spring MVC, Spring Data, Spring Security, Spring Batch, Spring State Machine
ORM	JPA, Hibernate
Message Queue	Apache Kafka, RabbitMQ
Data Processing	Apache Spark
Tooling	Eclipse Memory Analyzer, JPofiler, Git, IntelliJ, Sonar, Selenium
Database	Postgresql/MongoDB/Elasticsearch basic knowledge for usage

Architecture

Object Oriented Analysis & Design

Microservice Architecture

Design Patterns

Devops

Kubertenes	
Docker	
Bash Script	
Vagrant	
Ansible	
Jenkins/Travis CI	basic knowledge to usage
Google Cloud	basic knowledge to usage
AWS	basic knowledge to usage

Frontend

Common	HTML5, CSS3
Javascript	AngularJs , Angular
Java	JSP, JSF, Thymeleaf
